

How to access j2e - Turtle

Go to hwb.gov.uk and click on Log In.

Then enter your username and password. These were in the home learning packs that you were given.

 j2e Just2easy

Once you are logged in, look for the sign j2e Just2easy and click on it. This may be in a different place on your home screen compared to the example shown above.

j2e will then open in a new window on your internet browser and look like the picture above. Once on this screen click on the JiT symbol as circled above. This will then open into another window that looks like the picture below.

Once on this screen, looking at the option along the top, click on Turtle (as circled above).

You then have a selection of options to choose from in order to use for your position and direction activity.

Using the big bad wolf background, you can then move the wolf around the map using the arrows.

As you can see, the instructions then appear on the left side of the page. If you make a mistake, you can click on the x next to it to remove it and correct it. Once you have completed your journey, you can then press play (blue circle) to watch the wolf go around the map.

If you want to challenge yourself, change the option above the play symbol from 'Simple' to 'Advanced'. This time the wolf won't move until you press play after making your instructions. Again, if you've made a mistake and need to correct it, simply click the cross on the mistake.

Once you've completed your instructions and have tested it, you can save your work by clicking the save disk (above inside the orange circle).

Feel free to browse the other tabs along with the Turtle tab for you to explore the different options available on Jit5.
